Welcome to TK Products

TK Products is a manufacture of construction chemicals. This web site is created as a source of information to architects, engineers, contractors, and applicators.

[Air /Vapor /Water Barriers](#) - next generation polymers to provide a long lasting elastomeric film to stop air leakage, vapor diffusion, and provide a water-resistive barrier.

[Today's Concrete Needs More](#)— a report written on the need for proper curing of concrete.

[Resealing Of Concrete](#)— it's value in stopping scaling from de-icing chemicals.

[Curing Concrete](#) - the surface strength of concrete could be 50% less... if left to air dry verses properly cured.

[To Contact Us:](#) in the e-mail to properly assist you please provide us with the following information: Name, Company name, address, telephone number and fax number.
